

# iC Niagara Expansion Pack

MODEL	DESCRIPTION
iC Niagara Expansion Pack	A comprehensive solution for expanding the Niagara Framework environment with iSMA CONTROLLO Niagara software and MAC36 support packages

## APPLICATION AND USE

The iC Niagara Expansion Pack is a comprehensive file installer designed for Niagara Framework users who do not utilize iC Workbench, but use iSMA CONTROLLO products like MAC36 controllers, I/O modules, and others. This all-in-one installer includes the latest versions of all iC software products specifically tailored for the Niagara Framework, ensuring users have access to the most current and compatible tools for their projects.

## FEATURES

### Comprehensive package

Contains both MAC36 support files for Niagara and iSMA CONTROLLO Niagara modules.

### All-in-one installer

Combines all iC software products dedicated to the specific Niagara Framework version in a single, convenient installation package.

### Transparent installation process

Users are fully informed about what is being installed on their PCs, providing clarity and control over the installation process.

### Up-to-Date MAC36 support files

Includes the latest versions of support files for MAC36PRO and MAC36NL devices, ensuring the latest features of Niagara Framework on MAC36.

### Regular updates

iC Niagara Expansion Pack is released for every new supported Niagara version by iSMA CONTROLLO.
