

NAME	DESCRIPTION
Software version 1.7.0 Release date 18 Jun 2025	New functionalities: - Libraries: VAV and ComfortControl - BACnet: - Foreign Device - Service: - Configuration Data service - IO: - PressureInput component - RotaryActuator component - Logic: - EqualNull component Improvements: - New slots in components - Number of Components slot added in the Applications container component and Application component - Info slot, which provides information about non-OK statues of the component, added in the following components: - BACnet: Device, LocalDevice, AnalogCustomPoint, BinaryCustomPoint, StringCustomPoint, AnalogPoint, BinaryPoint, MultistatePoint, - Modbus: Device, LocalDevice, AnalogPoint, BinaryPoint, MultistatePoint, StringPoint, Gateway, - Core: Network, IpPort, SerialPort, AnalogDataPoint, BinaryDataPoint, - IO: LocalIO, UniversalInput, DigitalInput, DigitalInputCounter, AnalogOutput, DigitalOutput, TriacOutput, DipSwitch - Default Status slot added in the following components: - Logic: Toggle, - Process: Latch; - IP Manager Discover Enabled slot added in the Ethernet1 component (in the System container). - BACnet - Possibility to remotely change BACnet ID of objects exposed to the BACnet network (LocalDevice, AnalogDataPoint, BinaryDataPoint, MultistateDataPoint, Calendar, AnalogSchedule, BinarySchedule, MultistateSchedule) - Platform - AutoIP mechanism added to the DHCP component

NAME	DESCRIPTION
Software version 1.6.1 Release date 17 Mar 2025	Improvements: • Logs ◦ Changed default log level from Important to Critical ◦ Added mechanism automatically switching the log level back to the default state (Critical) after 24 hours from any change in the log level Fixed bugs: • Process ◦ Fixed problem with the Loop component with the Min Output and Max Output slots • Corrected system behavior that led to nano EDGE ENGINE controllers to fall into the emergency mode • Fixed problem with resizing components on the Wire Sheet when using the Description slot

NAME	DESCRIPTION
Software version 1.6.0 Release date 30 Jan 2025	New functionalities: • BACnet ◦ Device discover function added ◦ Object discover function added • Logic ◦ Numeric2Binary component added • Process ◦ Multilinear, Deadband, Sequence components added • Other ◦ Pulser component added Improvements: • BACnet ◦ BACnet device ID in LocalDevice based on the device's serial number

NAME	DESCRIPTION
Software version 1.5.1 Release date 17 Mar 2025	Improvements: • Logs ◦ Changed default log level from Important to Critical ◦ Added mechanism automatically switching the log level back to the default state (Critical) after 24 hours from any change in the log level Fixed bugs: • Corrected system behavior that led to nano EDGE ENGINE controllers to fall into the emergency mode

NAME	DESCRIPTION
Software version 1.5.0 Release date 23 Jul 2024	New functionalities: • Schedules ◦ MultistateSchedule component added ◦ BACnet extension for AnalogSchedule, BinarySchedule, and MultistateSchedule components • BACnet ◦ Device Management – Device Communication Control functionality added Improvements: • System ◦ DST Status slot added to the Platform component • Modbus ◦ Extended Modbus addresses range Fixed bugs: • System ◦ Fixed SetUTCTime action in the Time component • Modbus ◦ Fixed problem with Write On Up and Write On Enable functionalities on Modbus network • Schedules ◦ Fixed problem with writing schedules over BACnet • Other ◦ Fixed problem with missing value in the Out slot of the StringAdd component

NAME	DESCRIPTION
Software version 1.4.1 Release date 13 Nov 2023	Improvements: • Modbus RTU – support function code 06 for writing single register

NAME	DESCRIPTION
Software version 1.4.0 Release date 30 Oct 2023	New functionalities: • Core ◦ Multistate Data Point component • Modbus ◦ Multistate Point component • BACnet ◦ Multistate Point component ◦ Analog Custom Point component ◦ Binary Custom Point component ◦ String Custom Point component • Schedules ◦ Multistate Schedule component ◦ Calendar component Improvements: • Core ◦ Modes for Analog Data Point, Binary Data Point components ◦ Steady Time slot for the Serial Port component in Modbus • Local IO ◦ Read Other Properties action Fixed bugs: • Fixed problem with the On Off Delay component • Fixed problem with freezing components

NAME	DESCRIPTION
Software version 1.2.1 Release date 12 Sep 2023	Fixed bugs: • Bug fix in Ethernet switch mode

NAME	DESCRIPTION
Software version 1.2.0 Release date 14 Mar 2023	New functionalities: • Platform ◦ DNS component ◦ NTP Client component • Modbus ◦ Modbus TCP/IP client ◦ Gateway extension for Modbus Local Device • Schedules ◦ Analog Schedules component ◦ Binary Schedules component • Other ◦ Analog 2 String component ◦ Binary String Switch component ◦ String Add component Improvements: • Core ◦ Action Trigger extension for components with actions • Modbus ◦ Bits extension for Modbus Analog Point

NAME	DESCRIPTION
Software version 1.1.0 Release date 12 Sep 2022	New functionalities: - Platform - DHCP - Modbus - Modbus TCP/IP server Improvements: - Core - Modbus TCP/IP native extension added to Data Points - Unified names of slots

NAME	DESCRIPTION
Software version 1.0.0 Release date 29 Apr 2022	First release
